

Plymouth Children's University Lecture

Waterworks! at the National Marine Aquarium

Join us at the National Marine Aquarium where you will discover what it takes to get water into our tanks and then to keep it clean. After finding out how we do it, it will then be your turn!

Using piping, bamboo, string and a creative mind, have a go at getting water into your own aquarium exhibit.

Will you solve the puzzle, stay dry and build your own Waterworks?

The lecturer for this event will be Conservation Biologist, Nicola Murray from the National Marine Aquarium.

The lecture will be interactive, with time for the children to ask questions at the end of the talk.

Entrance to the lecture is free but this does not include entrance to the aquarium. If the children wish to look around the aquarium after the lecture, they will have to purchase an entrance ticket. If you have an annual family membership, please bring this with you to access the aquarium after the lecture.

Saturday 1st February 2014

The lecture will begin at 10.30 am and ends at 11.30 am

For young people aged 8 to 14 years

(11 years and under must be accompanied by an adult)

Children can arrive from 10am when the aquarium doors open, come to the Plymouth Children's University banner near reception and you will be directed to the Learning Resource Centre.

Location: Aqualab in the National Marine Aquarium's Learning Resource Centre, National Marine Aquarium, Rope Walk, Coxsides, Plymouth.

SPACE IS LIMITED SO BOOKING IS ESSENTIAL.
